Reasons for Allowance

Claims 15-20 are allowed because the references of record do not teach or fairly suggest filtering a liquid downwardly through a stacked media of crumb rubber particles made from tires, wherein the crumb rubber particles are stacked such that crumb rubber particles near the bottom of the filter are compressed by the weight of crumb rubber particles stacked towards the top of the filter to form the recited porosity gradient.

It is agreed that Rieber teaches away from this structural configuration by disclosing that the rubber particles employed in this reference system are “substantially uncompactable ... at temperature and pressure ranges at which filtration of the solid particles occurs” (col. 8, lines 15-17).

Also, it is noted that Rieber does not disclose a bed of “stacked” media (e.g. a deep bed filter); and therefore, uppermost crumb rubber particles will not necessarily have a sufficient weight to compress lowermost crumb rubber particles in this reference system. Accordingly, this reference system will not inherently produce the recited bed configuration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is 571-272-1155. The examiner can normally be reached on Monday through Friday from 8:30 AM to 5:00 PM. If
